## Product Connection

If your existing product runs out of stock or you find the same product but cheaper at nihoadropshipping.com, then you might want Nihao to be the supplier of your existing products. That's why you need the product connection service.

### Steps:

1. Go to **Product Connection>Add Connection**, here you will see two product listings. The list on the left shows the products from your Shopify store, and the list on the right shows the products from Nihao Dropshipping.

If you have authorized multiple store, please select one store in the drop-down list first.

The percentage in the bottom right corner of each product represents the percentage of its variants connected to the Nihao product variants.

2. Pick the product you want to be connected from your store and find the same product on Nihao by searching.

3. Click the **"Connect"** button when you find the same product and a pop-up window appears to allow you to map its variants.

4. Select the variant of your store and connect it to the Nihao product variant in the products-connection column on the left.

Remember to **modify the quantity** in case the product you are selling on Shopify was a bundle of two or more products.

You can see and modify the connected product variants in the associated product column on the right.

Go to **Product Connection>Connected SKU** to edit the variants of the connected product. Click the product you need to edit and disconnect the wrong connected variants.

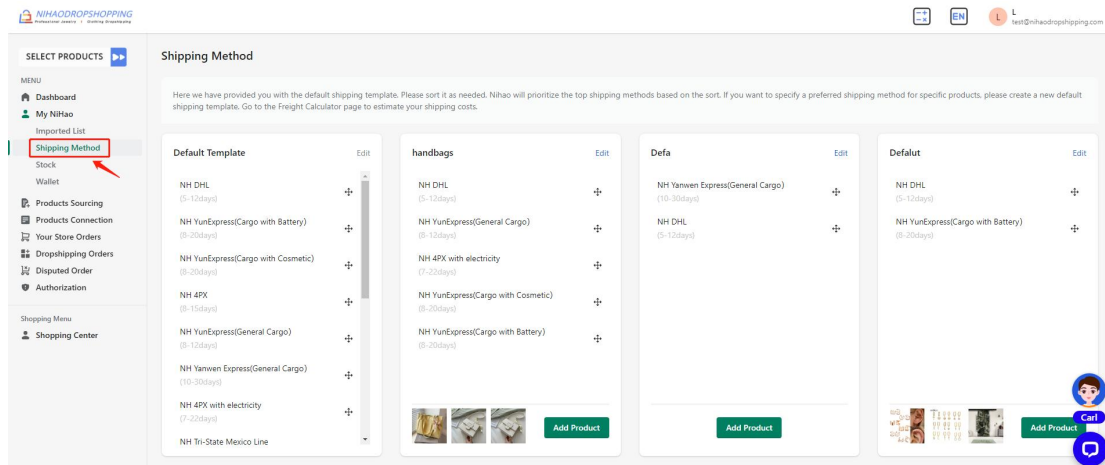

You can reconnect the correct variant on the left side.

## Shipping Options and Cost Calculator
